Summary

Undergraduate at UIT who enjoy writing code to solve problem. Having worked with multiple languages and frameworks in the past, I develop a good understanding of **OOP**, **data structure** and **programming logic** and can generally apply it anywhere else when learning new things. Technologies used: `React`, `SCSS`, `Typescript`, `Webpack`, `Flutter`, `Git`. Depending on the project's requirements, I can seek to learn new technologies fast and quickly integrate into the new team's workflow.

With over 10k reputations on Stackoverflow, I am in the **top 1%** answerers in ReactJS topic and **top 10** answerers in Material-UI topic. I have the communication skills to help other developers debug and tackle techinal problems by providing working demos and insightful explanations on the domains that I know well.

Skills

Frameworks and Libraries

ReactJs Material-UI Bootstrap Webpack Flutter

Languages

JavaScript TypeScript SCSS Dart CSS

Personal Projects

SFD Profile Editor Feb-Mar 2021

Technologies: React, Typescript, Material-UI, CRA
Summary: An internal tool to generate C# code for my game script when editing the character profile in SFD
Url: github.com/NearHuscarl/SFD_Profile_Editor

Flutter Login Sep-Nov 2019

Technologies: Flutter, Dart
Summary: Login screen with cool animation effects
Url: github.com/NearHuscarl/flutter_login

Castlevania Oct 2018 - Feb 2019

Technologies: C++, DirectX 9, Xml
Summary: A remake of Castlevania NES (Block 01)
Url: github.com/NearHuscarl/Castlevania

NearAcademy Nov-2019 Jan-2020

Technologies: React, SCSS
Summary: Front-end implementation of an online education webpage
Url: github.com/NearHuscarl/nearacademy

EDictionary May-Jul 2018

Technologies: C#, WPF, MVVM, SQLite
Summary: An english dictionary app written in C# and WPF
Url: github.com/NearHuscarl/EDictionary

Termite Color Switcher Mar 2018

Technologies: Shell
Summary: Utility script to manage and edit themes in termite terminal
Url: github.com/NearHuscarl/termite-color-switcher
